Valerie - VALorising European Research for Innovation in agriculturE and forestry

To improve the availability and flow of new knowledge & information to drive innovation in agriculture and forestry around six themes:

i. Crop rotation, soil cover management & integrated pest management

ii. Ecosystem and social services in agriculture and forestry

iii. Soil management in agriculture

iv. Water management in agriculture

v. Integrated supply chain services and tools

vi. Recycling & smart use of biomass and food waste

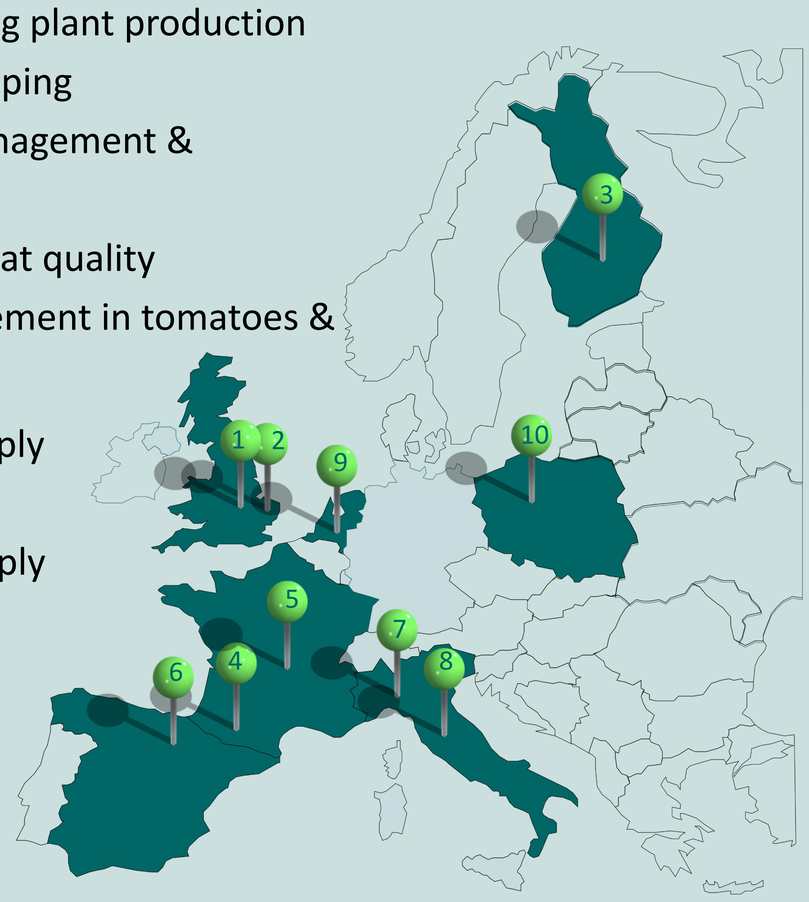
Valerie will:

- Review and summarise knowldege – from national, international & EU research projects & studies – to encourage innovation in agriculture & forestry
- Convert research outcomes with innovation potential into formats for farmers, advisers & enteprises in the supply chain
- Consult stakeholders in **ten case studies** to identify knowledge gaps, assess technical & economic viability of innovative solutions & to reveal barriers to uptake
- Develop an advanced search engine (**ask-Valerie.eu**) that will interactively provide easy access to knowledge for farmers, foresters, agricultural organisations & researchers

ask-Valerie.eu

Case studies:

1. Catchment scale resource use efficiency
2. Soil management in livestock supply chains
3. Sustainable forest biomass
4. Agroecology: managing plant production
5. Innovative arable cropping
6. Sustainable forest management & ecosystem services
7. Improving milling wheat quality
8. Drip irrigation management in tomatoes & maize
9. Sustainable onion supply chains
10. Sustainable potato supply chains



This project is funded as a coordination and support action under the 7th European Framework Programme: Grant Agreement No.: FP7-KBBE-2013-7-613825-VALERIE

Duration: January 2014 – December 2017

Coordinator:
Hein ten Berge (DLO): hein.tenberge@wur.nl
